

# ILLUMINATING GLASSWARE

INLAND GLASS WORKS INC.  
CHICAGO, U.S.A.

# Inland

THE LARGEST IN THE MIDDLE WEST

## INLAND GLASS WORKS, Inc.

### *Policy ~ Aims ~ Product ~ Plant*

**POLICY**—We will carry through without qualification the spirit of all our agreements and our indicated intentions.

**AIMS**—We will endeavor to furnish the finest Illuminating Glassware of its kind that can be produced and on a basis which will insure to all concerned a fair reward for their labor and value in full to the user.

**PRODUCT**—In this, our first catalog, the fine Illuminating Glassware shown has been thoughtfully selected, some from the large number of former designs, other designs created to meet the requirements of progress. Whether it is needed for the huge office building, the modern store, or the home, a suitable item will be found in this "clean cut" short but complete catalog line.

**INLAND "SNOW-WHITE" GLASS** has no superior. By test it is highly efficient, the soft white surface is beautiful either lighted or unlighted, the mechanical strength and diffusing qualities are near perfection.

**INLAND UNITS** are attractive and are correctly designed to give the character of illumination specified for each one.

**INLAND DECORATED GLASSWARE** merits attention and approval. The selected designs, which are in appropriate colors, are hand applied and "fired in". This complete line in permanent colors is attractive and meets all normal requirements.

**INLAND ALABASTER OR CASED GLASSWARE** is made of the same high quality glass as "Snow-White". Thousands of these globes are lighting the streets of our finest cities. Our cased units are efficient and fine in color.

**PLANT**—The Inland plant was built expressly to manufacture Illuminating Glassware and is one of the largest and finest in this country. Its trained organization, technical staff, and ideal shipping facilities enable it to serve its patrons well.

INLAND GLASS WORKS, Inc.

# The No. "72" Line of "Snow-White" Units

## Deep Type

# New Specification Glassware

## New Semi-Indirect Units

The latest developments in lighting the home are fixtures of the semi-indirect type, illustrated above. Scientific design has been combined with rich artistic treatment to provide a lighting unit that both delights and protects the eye. Below are shown two new types of shades lately designed for fixtures of this class.

Number	Decoration	Fitter	Size	Quantity
5096	Amber on white	2 1/4	6	4
5097	Amber on white	2 1/4	6	4

This new type shade is for refixturing as well as lighting new homes. We do not make or sell the fixtures. Our complete facilities are available for the design and manufacture of glassware for any special conditions. Write for details.

## "Clear-Top" Units

This unit is the latest and most scientific development for the semi-indirect illumination of offices, stores and public buildings.

The entire absence of glare makes this a very desirable unit where there is a condition requiring the elimination of eye strain. Numbers, decorations and descriptions follow.

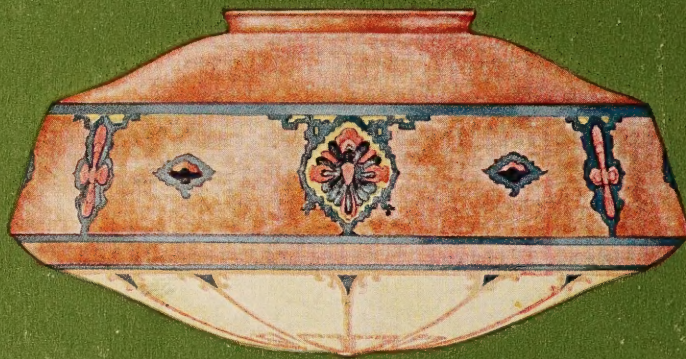

Number	Glass	Fitter	Diameter	Quantity
7529	Plain, amber or white	4	12	
7529D502	Decorated white enamel	4	12	
7529D504	Decorated amber enamel	4	12	
7530	Plain, amber or white	4	14	
7530D502	Decorated white enamel	4	14	
7530D504	Decorated Amber Enamel	4	14	
7531	Plain, amber or white	6	16	
7531D502	Decorated white enamel	6	16	
7531D504	Decorated Amber Enamel	6	16	

Decoration 502 is two bands and bottom rosettes on white enamel.  
 Decoration 504 is the same on amber enamel.
